program **OVERVIEW**

Module A: Fundamental of Transformative Coaching

The coaching conversation is a special conversation. As the primary vehicle for the coach to deliver the coaching, it is a conversation in which the Coach is speaking and listening with a total commitment to help a person to succeed. This is the most important module where students learn how to create a safe psychological space for their client to articulate what is not only known, but what is unknown to their conscious mind, as well.

- **3rd Generation of Professional Coaching**
- **4 Coaching Paradigms**
- **Reflective Inquiry Process**
- **Applying Positive Psychology**

Module B: Transformative Principles

Perspective transformation leading to sustainable change is the result of active and deep listening. It fuels the coach's capacity to ask powerful questions that directs the attention to areas that have not yet been considered, enabling new understanding through thoughtful and reflective thinking. In this module, we will cover the transformative principles required to create a powerful perspective transformation.

- **Power of Observation**
- **Narrative Experience of the Story**
- **Narrative Layout of the Story**
- **Narrative Element of the Story**

Module C: Transformative Process

The ACC Conversation expands people's capacity for awareness and enables greater clarity in understanding. The coaching process stimulates reflective thinking resulting in a powerful shift in thinking to align their greatest inspiration with action and hold them accountable to their decision. It is a deep and focused coaching conversation that shifts the attention from a situational context to personal awareness, thus uncovering how people construct their own meaning, understanding what really matters most, and then using this emerging understanding to create a clear path forward.
